Sriram Kannan V

Full Stack Developer

Professional Summary

I'm a detail-oriented Full-Stack Developer specializing in modern JavaScript and the **MERN stack (MongoDB, Express.js, React.js, Node.js)**. I build responsive, high-performance web applications by bridging clean, user-friendly interfaces with robust **back-end architectures**. I'm passionate about writing scalable code, **integrating RESTful APIs, optimizing database performance**, and **delivering secure, end-to-end software solutions**.

Technical Projects

Suite of React Web Applications (FinTrack, Zenith Tasks, API Explorer)

React.js, Vite, RESTful APIs, Chart.js, Bootstrap

- **FinTrack (Financial Dashboard)**: Integrated Chart.js and global state management to visualize real-time, interactive expense trends.
- **Zenith Tasks (Task Manager)**: Implemented persistent browser local storage, dynamic state filtering, and a modern glassmorphism UI.
- **API Explorer**: Utilized asynchronous JavaScript (async/await) to fetch, parse, and render dynamic data from external REST APIs.

Education

B.Sc. Visual Communication, Jamal Mohamed College, Trichy

2023 - 2026

- Strong academic foundation with focus on **media and design**.
- Exposure to **hands-on projects, film-making and photography**.

Technical Skills

Frontend Development

- HTML5, CSS3 & Responsive Web Design
- Bootstrap & Vite
- State Management & UI Component Design

Backend & Databases

- Node.js & Express.js
- MongoDB & Data Modeling
- RESTful API Development & Integration

Tools & Methodologies

- Version Control (Git & GitHub)
- Performance Optimization
- Problem-Solving, Debugging & Testing
